# Breast Reduction

## Treatment Information Sheet

### What are breast reduction treatments?

A breast reduction can be done one of two ways, liposuction or surgery, to resolve overly heavy breasts.

Breasts that are too big for a woman's frame tend to cause uncomfortable problems.

### A breast reduction can help resolve:

- Chronic back and neck pain
- Poor posture
- Clothes that don't fit properly
- Improved self confidence

### Liposuction breast reductions

- Visible reduction of breast size
- No scarring
- Day procedure
- Faster recovery

### Technology we use for breast reductions

We use liposuction or surgical procedures for breast reductions, with a preference for liposuction as it gets excellent results with far less damage to tissue.

### When can I expect to see results?

As the swelling resolves, the breast will go back to its normal size, and the breast reduction will be revealed. This takes a couple of months.
