# Facial Sculpting Program

## Treatment Information Sheet

### What is the facial sculpting program?

Enhancing the lines of the face can have a remarkable impact on your profile, creating a more youthful, streamlined appearance.

Having facial sculpting no longer means serious surgery, as we now have high-tech fillers, muscle relaxants, and skin-tightening treatments to do the work for us. Sometimes, sculpting surgery may be required.

### Facial sculpting can include:

- Correcting a large or square jaw
- Remove chin dimples and creases
- Remove fat pockets in the face and jowls
- Create a beautiful neckline
- Eliminating or reducing wrinkles
- Softening facial creases

### How soon will I see results?

Most facial sculpting treatments offer immediate results with very little downtime. Swelling and redness is typically minimal, so you can walk in and walk out.

Non-invasive facial sculpting means your treatments are subtle, work with your natural beauty to enhance it, and leave no trace.
